Capital Credit Statements to be Mailed

Lacreek Electric is operated on a nonprofit basis because we are owned by those we serve.

We are not motivated by the potential profit. Electric cooperatives, unlike investor-owned utilities, do not have stockholders that must be paid a return. In short, the price to obtain electricity from your cooperative are cost-based and are kept as low as possible.

Capital credits are unique to cooperatives like Lacreek Electric. They represent the margins (capital remaining after the expenditures) allocated to a cooperative member each year.

Capital credits become the cooperative's equity. This equity makes it possible to secure loans and maintain facilities and services to deliver electricity to each member.

Lacreek's board of directors decide when the cooperative's equity is sufficient to return the capital credits as cash to its members.

Each member who received electricity in 2016 will receive these statements. This is for information only and is NOT to be deducted from any energy bill that needs to be paid.

If any member needs more information about the notice, please contact the Lacreek Electric office at 685-6581. 1052100308

Tip of the Month

Setting your thermostat to a colder setting than normal when you turn on your air conditioner will not cool your home any faster and could result in excessive cooling and unnecessary expense.

Beware of Summer Dangers

Weather forecasting science is not perfect and some tornadoes do occur without tornado warning. There is no substitute for staying alert to the sky. Here are some things to look for:

- * Strong persistent rotation in the cloud base. 2501810709
- * Whirling dust or debris on the ground under a cloud base-tornadoes sometimes have no funnel.
- * Hail or heavy rain followed by either a dead calm or a fast intense wind shift.
- * Day or night-loud, continuous roar or rumble, which doesn't fade in a few seconds like thunder.
- * Persistent lowering from the cloud base, illuminated or silhouetted by lightning, especially if it is on the ground or there is a blue-green-white power flash underneath.

WHAT TO DO.....

In a house with a basement: Avoid windows. Get in the basement and under some kind of sturdy protection or cover yourself with a mattress or sleeping bag. Know where very heavy objects rest on the floor above (pianos, refrigerator, water beds, etc.) and do not go under them. They may fall down through a weakened floor and crush you. Head protection such as a helmet, can offer some protection also.

In a house without a basement, a dorm or an apartment: Avoid windows. Go to the lowest floor, in the center room (like a bathroom or closet), under a stairwell, or in a hallway with no windows. Crouch as low as possible to the floor, facing down, and cover your head with your hands. A bath tub may offer a shell of partial protection. Even in an interior room, you should cover your self with some sort of thick padding to protect against falling debris in case the roof and ceiling fall.

In a mobile home: Get out! Even if your home is tied down, it is not as safe as an underground shelter or permanent, sturdy building. Go to one of those shelters, or to a nearby permanent structure. Again a helmet can offer some protection against head injury.

After the tornado.....keep your family together and wait for emergency personnel to arrive. Stay away from power lines and puddles with wires in them; they may still be carrying electricity! Do not use matches or lighters in case of leaking fuel nearby.

magazine and you will get a \$10.00 credit
on your next months bill. Please call our
office when you see your account number
in the magazine to receive your \$10.00
credit.

Summer Electrical Safety Tips

It's important to remember while enjoying the summer weather, while outside or around the home, that there could be a variety of electrical hazards lingering. While not obvious at first, these issues could cause very serious (and potentially fatal) injury through electric shock.

Below is a list of common outdoor and indoor hazards to be aware of this summer.

Outdoor Electrical Safety Power Line Safety

Stay away from power lines with your body, toys, sticks or anything an electrical current could travel down. Power lines transport extremely high voltage electrical energy. Venturing too close to a power line can create an opportunity for the electricity to flow to your body or object resulting in serious injury. If you see a fallen power line, call your local electric cooperative or 911 immediately.

Outdoor Electrical Receptacles

Ensure all your outdoor electrical receptacles around the exterior of your home or shed are covered, clean and dry. If water or dirt enters the outlet it can result in electrical surges and shocks when the outlet is next used. Receptacle covers can be purchased at most home renovation retail stores.

Water and Outdoor Electrical Devices

Keep all power cords, string lights and electrical devices away from ponds, swimming pools, hot tubs or sprinklers. Summer can lend itself to a lot of splashing and water flying through the air. If water comes into contact with an electrical device, there is a high risk of electrical shock. Do your best to keep electrical devices at a distance from the pool and water fights.

Indoor Electrical Safety GFCI Outlets

Ensure that you have GFCI's (ground fault circuit interrupter) outlets installed in certain areas of your home – namely rooms with running water (bathroom, kitchen, garage, basement, pool rooms, etc.). These outlets can prevent electrical shock from happening with specially designed safety mechanisms.

Circuit Breaker Use

In an emergency, know where your circuit breakers are and how to turn them off safely. When a panicked situation occurs, it can be easy to become confused and flustered. If you are knowledgeable interacting with your circuit breaker, you will be more confident in the event of an emergency.

Portable Fan Safety

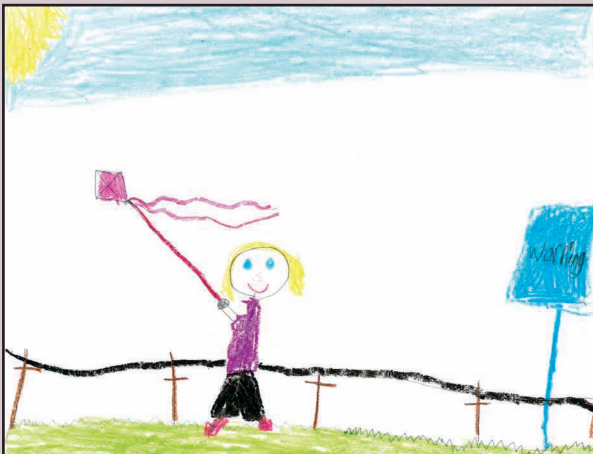

Before plugging in a fan, make sure that it is clean and there are no wires frayed or damaged. Oscillating fans are often stored for most of the year. During storage, power cords can become damaged and electrical wires exposed. Exposed wires leave you vulnerable to electrical shock when the fan is plugged in again.

Air Conditioning Unit Safety

Be sure to have any portable air conditioning units securely positioned and electrical cords tucked away. These are tripping hazards that can lead to either electrical shock or a heavy unit falling down. It's also important to follow the manufacturers instructions on maintaining and servicing the unit to prevent damage to the home's electrical system and personal injury.

It is important to be aware of potential electrical hazards in order to identify and avoid them.

Kids' Corner Safety Poster

"Don't fly kites near power lines."

Sara Bertram, 8 years old

Sara is the daughter of Erin and Kari Bertram, Corsica, S.D. They are members of Douglas Electric Cooperative, Armour, S.D.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

Succulent Salads

Peach Jello Salad

- | | |
|-----------------------------------------------------|---------------------------------------|
| 1-1/2 cups crushed Ritz crackers | 1 (29 oz.) can sliced peaches |
| 1/2 cup margarine, melted | 1 (8 oz.) pkg. cream cheese, softened |
| 3/4 cup plus 4 T. sugar, divided | 1 T. milk |
| 2 (3 oz.) boxes peach jello | 3/4 cup whipped topping |
| Juice from peaches plus water to equal 3 cups total | |

Mix cracker crumbs, margarine and 4 T. sugar together; press into a 9x13-inch pan. Bake at 350°F. for 10 minutes. Cool. Boil juice from peaches and water. Stir in jello to dissolve. Chill until slightly congealed. Cream together cream cheese, remaining sugar and milk. Fold in whipped topping. Spread on cooled crust. Lay peaches on top. Pour congealed jello over peaches. Chill until set.

Debbie Hinman, Carter

Coleslaw

- | | |
|----------------------------------------------------------------------------|----------------------------|
| 6 to 7 cups chopped cabbage, carrots, red or green pepper, celery or onion | 1/2 cup water |
| | 1/2 cup white wine vinegar |
| | 1 cup sugar |

Place chopped vegetables in bowl. Boil water, vinegar and sugar; pour hot mixture over all. Refrigerate. Keeps up to 1 month in refrigerator.

Jan Nelson, Belle Fourche

Mom's Cranberry Salad

- | | |
|----------------------------------------|----------------------|
| 1 quart cranberries, grind when frozen | 1 cup hot water |
| 2 cups sugar | 1 cup ground celery |
| 1 pkg. orange jello | 2 cups ground apples |

Combine cranberries and sugar; let stand overnight. Dissolve jello in hot water; chill until thickened. Stir in cranberries, celery and apples. May substitute lemon jello.

Verna Nelson, Wakonda

Blueberry Salad

- | | |
|--------------------------------------|-----------------------------------------|
| 1 (21 oz.) can blueberry pie filling | 1 (14 oz.) can sweetened condensed milk |
| 1 can crushed pineapple, drained | 1 (8 oz.) container Cool Whip |
| 1 can mandarin oranges, drained | |

Combine all ingredients; refrigerate.

Alberta Olson, Piedmont

Greek Pasta Salad with Cucumber Yogurt Dressing

- | | |
|--------------------------------------------|--------------------------------------------|
| 1/2 cup cucumber, peeled, seeded and diced | 1/2 tsp. Sicilian sea salt |
| 1/2 cup plain Greek nonfat yogurt | 8 oz. pasta, such as cellentani or gemelli |
| 2 T. light mayonnaise | 2 cups broccoli florets |
| 1 tsp. lemon juice | 1 cup heirloom cherry tomatoes, quartered |
| 1 tsp. garlic powder | 1/4 cup thinly sliced red onion |
| 1 tsp. dill weed | 1/4 cup pitted Kalamata olives, quartered |
| 1/2 tsp. oregano | 2 T. crumbled feta cheese |

For dressing, place cucumber, yogurt, mayonnaise, lemon juice, garlic powder, dill, oregano and sea salt in blender container; cover. Blend on high speed until smooth. Refrigerate until ready to use. For salad, cook pasta as directed on package, adding broccoli during the last 1 minute of cooking. Rinse under cold water; drain well. Place cooked pasta, broccoli, tomatoes and onions in large bowl. Add dressing; toss gently to coat. Top with olives and feta cheese. Serve immediately or refrigerate until ready to serve. Makes 8 servings

Nutritional Information Per Serving: Calories 151, Total Fat 3g, Sodium 274mg, Cholesterol 2mg, Carbohydrates 25g, Dietary Fiber 2g, Protein 6g

Pictured, Cooperative Connections

Shoestring Potato Salad

- | | |
|------------------------------|------------------------|
| 1 cup salad dressing | 1 cup diced celery |
| 1/2 tsp. vinegar | 1/2 diced green pepper |
| Salt and pepper to taste | 3 oz. slivered almonds |
| 2 cups cooked, diced chicken | Shoestring potatoes |
| 1 cup grated carrots | |

Mix together salad dressing, vinegar, salt and pepper. Add next 5 ingredients; refrigerate overnight. Just before serving, add shoestring potatoes.

Doris Miller, Brandon

Chicken Salad

- | | |
|------------------------------|------------------------------|
| 1 cup mayonnaise | 2 green onions, chopped |
| 1 tsp. paprika | 1/2 cup minced green pepper |
| 1 tsp. seasoned salt | 1 cup chopped pecans |
| 1-1/2 cups dried cranberries | 4 cups cubed, cooked chicken |
| 1 cup chopped celery | Ground black pepper to taste |

In a medium bowl, mix together mayonnaise with paprika and seasoned salt. Blend in dried cranberries, celery, onion, bell pepper and pecans. Add chopped chicken; mix well. Season with black pepper to taste. Chill 1 hour.

Courtney Reedy, Tea

Please send your favorite garden produce, pasta or slow cooker recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2017. All entries must include your name, mailing address, telephone number and cooperative name.

The Benefits of Air-Source Heat Pumps

Patrick Keegan
Collaborative Efficiency

Dear Pat: It looks like we'll be needing to replace our furnace soon, and we're wondering if a heat pump would help us save some money. Do you have any suggestions? – **Jonathon**

Dear Jeff: Your question is an excellent one, since for most of us, heating and cooling accounts for the largest

part of our household energy use. An electric air-source heat pump can be a good alternative to a furnace system that runs on propane or fuel oil. A heat pump is also a cost-effective alternative to electric resistance heat that is used in electric furnaces and in baseboard and wall units.

How heat pumps work

In the summer, an air-source heat pump acts as an air conditioner (AC) that draws heat from your home's air and transfers it outside. In the winter, the system's direction is reversed so that heat is pulled from the outside air and moved into your home.

The heat pump has two major components: the condenser (also called the compressor) that circulates refrigerant through the system; and an air handler that distributes the conditioned air. Most heat pumps are split systems, with the condenser located outside and the air handler inside. A packaged system contains both components in one unit that is placed outside your home. Heat pumps usually distribute the hot or cold air through the duct system. Ductless mini-splits, which can serve as many as four rooms, will be covered in next month's column.

In the past, heat pumps weren't efficient enough to work in colder climates. In recent years, however, technology has advanced to make them viable in climates with long periods of sub-freezing temperature, such as the Northeast U.S.

If your old furnace has an air conditioner (AC) attached, replacing both the heating and cooling system with the all-in-one solution of a heat pump might produce significant cost savings. If you are currently cooling with window units, or

have an older central AC, moving to an air source heat pump could reduce your summer energy bills.

Heat pumps not only reduce energy costs, they can also eliminate the risk of carbon monoxide poisoning and problems that can occur with on-site storage of propane or heating oil.

Heat pumps must work harder to extract heat as the outside temperature drops. At some point the heat pump switches to resistance mode, which operates the same way a toaster or an electric baseboard heater works. If your area has very cold winters, you should consider a dual fuel system, which utilizes a heat pump along with a gas or propane furnace.

Selecting and installing

If you live in a cold climate, look for a unit with a higher HSPF rating, which measures heating efficiency; if you live in a warm climate, you probably want to focus more on the SEER rating, which measures cooling efficiency. The minimum standard heat pump is SEER 14 and HSPF 8.2. An easy way to compare options is to look for the ENERGY STAR® label. This indicates the unit is at least 15 SEER and 8.5 HSPF. Visit www.energystar.gov to learn more about equipment, installation and qualified contractors.

How much can a heat pump reduce your energy costs? This depends upon the size and efficiency of your home, local energy prices and local climate. You can find calculators online that can help you predict energy savings. One entry with sample data found that the cost of heating in South Carolina, using a new heat pump and national average fuel costs, was less than half the cost of heating with a typical propane furnace or an electric resistance system.

Energy auditors can predict energy savings with greater precision, and they can offer advice on choosing a specific brand and size of the unit. More importantly, energy auditors can suggest other ways to improve comfort or reduce energy use such as duct sealing or insulating the building envelope.

Your local HVAC dealer, if they have heat pump experience, can be very helpful. Many heat pumps are not installed correctly, so be sure to ask how they will ensure a quality installation. Contact your local electric co-op to find out what they recommend. They may even offer rebates, free audits or discounted rates for electric heat.

This column was co-written by Pat Keegan and Brad Thiessen of Collaborative Efficiency. For more information on how to consider energy efficiency when purchasing electric vehicles, please visit: www.collaborativeefficiency.com/energytips.

SDSM&T Student Wins National Electric Co-op Scholarship

Travis Grablander, an engineering student at South Dakota School of Mines and Technology in Rapid City, S.D., was one of two recipients of the Glenn English Foundation and

IEEE-Rural Electric Power Committee (REPC) "Engineers for the Future" Scholarship.

This is the first year that the two, \$2,000 scholarships were awarded to college students pursuing careers in electrical engineering — specifically those college students who plan to return to rural areas once they complete their college careers.

Since 2014, The Glenn English National Cooperative Leadership Foundation has awarded \$56,000 in scholarships to Rural Electric Youth Tour Alumni. In 2017, the engineering scholarships were created and do not require that recipients be past Youth Tour participants.

These scholarships could not be possible without the foresight and generous contributions of the IEEE:REPC. With IEEE:REPC's support and vision, the Foundation hopes to support future engineers that will help define and solve the electric utility challenges of the future.

The two \$2,000 scholarships will be awarded annually to college students seeking a career in the rural electric engineering fields.

Grablander is from Mission, S.D. The other recipient of the scholarship was Ty Tamplin of Texas.

The recipients of the The Glenn English National Cooperative Leadership Foundation \$10,000 scholarship was Tess Otto of Wisconsin. Receiving \$1,000 scholarships from the program were Sylandi Brown and Hayden Johnson of Georgia, Sarah Locke of Illinois and Britta Becker of Iowa.

Teachers Learn About Coal, Receive College Credits

Teachers from a four-state region attended the Lignite Energy Council's Education Seminar on June 12 to 15, 2017, in Bismarck. The seminar, titled "Lignite Education Seminar: Energy, Economics and Environment," provided teachers with information on a variety of energy-related subjects that they can integrate into their curriculum, especially science and economics classes.

The Lignite Energy Council began conducting annual seminars for K-12 teachers in North Dakota and surrounding states in 1986. It's estimated that more than 3,500 teachers have attended the seminar over the past 30 years.

"Much has changed in the lignite industry over the past 30 years," said Kay LaCoe, LEC's director of membership marketing and education program administrator. "Every year, we make changes to the seminar to reflect the changes in the industry. This year we have several different speakers and a couple of different topics that will be of interest to teachers and eventually their students."

Teachers come from North Dakota, Minnesota, Montana, South Dakota and Wyoming — all states where electricity produced from the state's vast lignite reserves is sold to homes, farms and businesses. Teachers earn two graduate level professional development credits for attending the seminar.

Fourteen teachers from Minnesota and South Dakota participated in the seminar. Participating in the 2017 seminar were Brad Wollum, Wadena-Deer Creek Schools, Wadena, Minn.,

and, from South Dakota were Mike Anderson, Martin Grade School, Martin; Sarah Bross, Tiospaye Topa, Ridgeview; Lisa Deal and Lindsey Hettich, Miller; Kara Eise-mann and Kim Kightlinger, Selby Area High School, Selby; Jenni Kranz, Richard Myrvik and Elizabeth Parliament, Rutland Elementary School, Rutland; Whitney Muller, McLaughlin School District 15-2, McLaughlin; Joseph Roshau, Northwest Area Schools, Isabel; and Dale Singer, Spearfish Middle School, Spearfish.

Basin Electric Power Cooperative sponsored many out-of-state teachers at the Lignite Energy Council's Lignite Education Seminar in June. They toured the Great Plains Synfuels Plant, Antelope Valley Station and the Freedom Mine. Among the teachers sponsored by Basin Electric were, from left: Mike Anderson, who lives and teaches in Martin, S.D.; Jean Bowlds, who lives in Bloomfield and teaches in Glendive, Mont.; Sarah Bross, who lives in Eagle Butte and teaches in Ridgeview, S.D.; Tesha Frederick, who lives in Guernsey and teaches in Glendo, Wyo.; Neil Hamm, who lives in Great Falls and teaches in Power, Mont.; Kim Kightlinger, who lives and teaches in Selby, S.D.; Andrea Leinen, who lives in Wheatland and teaches in Chugwater, Wyo.; Amanda Lynch, who lives and teaches in Marcus, Iowa; Whitney Muller, who lives in Timber Lake and teaches in McLaughlin, S.D.; Joseph Roshau, who lives in Mobridge and teaches in Isabel, S.D.; and Dale Singer, who lives and teaches in Spearfish, S.D.

Reaching Out

Cooperative Resolution Seeks to Capture Attention of Equipment Manufacturers

IN RECENT YEARS, THE BOARD OF DIRECTORS AT Charles Mix Electric Association in Lake Andes, S.D., had noticed an alarming and growing trend.

As agricultural equipment grew in size as new models were developed, it was getting dangerously close to power lines.

"In our case, at a board meeting, we were discussing a situation where an implement wound up in the line in our territory," said Russell Gall, general manager for the cooperative in south central South Dakota. "It was obviously a very large piece of equipment that got tangled up in the neutral."

The operator called the co-op immediately and stayed in the implement until the equipment could

be safely removed from the line.

As the board discussed the incident and the dangerous situation caused because of the equipment's size, they talked about what could be done. Co-ops were already engaged in providing safety reminders about using caution around electric lines.

But the board wanted to take it a step further. They wanted to deliver their concerns to the companies that were designing and creating the behemoths of machinery.

"The board agreed to develop a resolution that would instruct NRECA to start conversations with national equipment manufacturers to raise awareness of line heights and the scale of the equipment,"

Brenda Kleinjan

said Gall.

By June 1, 2016, the board had drawn up a resolution and submitted it to the National Rural Electric Cooperative Association so it could be considered at the organization's regional meetings held each fall. At the regional meetings, the nation's 900 electric cooperatives gather to approve resolutions that guide NRECA's work on behalf of the cooperatives.

"I was surprised during the discussion in the resolutions committee, almost everyone on the committee had a story at their local cooperative where they could point to an incident and say, 'yes, this is a problem,'" said Gall.

The resolution eventually wound its way through all 10 of the NRECA's regional meetings.

"The resolutions process is a cornerstone of NRECA's governance, and member resolutions provide key direction to NRECA," said Kirk Johnson, NRECA's Senior Vice President of Government Relations. "The democratic nature of the resolutions process gives every member a voice and helps ensure that NRECA adheres to the wishes of the membership. As resolutions get adopted, NRECA staff work to respond appropriately."

As the Charles Mix proposal made its way through the resolutions process, it became apparent this was not simply a rural South Dakota issue.

"From what I heard at the different regional meetings, there were concerns that this might be too big of an issue to take on, but that it was really important," Gall said.

Cooperatives aren't known to shy away from difficult situations.

Next, it headed to the association's annual meeting where all the cooperatives gather to review and debate the resolutions.

In February, delegates in San Diego approved the resolution.

"In the case of the resolution related to agriculture equipment, NRECA will be reaching out to a number of manufacturers this summer to express

Among the resolutions considered by delegates to the NRECA annual meeting was one that originated in South Dakota regarding ag equipment and overhead power lines.

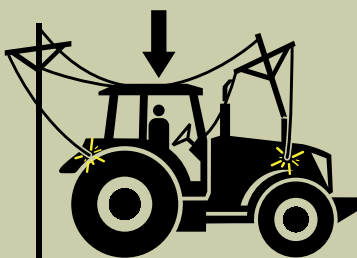

Touchstone Energy® Cooperatives

PoweringYourSafety.com

KNOW WHAT TO DO IF YOU HIT A POWER LINE

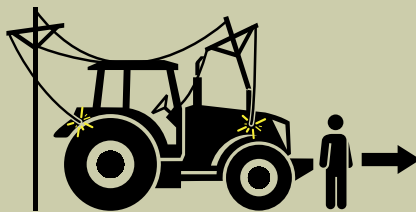

STAY PUT

If your equipment contacts a power line, stay inside. **DO NOT EXIT. Call 911.**

JUMP CLEAR

If you must exit due to a fire, jump from the equipment so that no part of your body touches the equipment and ground at the same time. Hop or shuffle with your feet together at least 40 feet away.

STAY AWAY

When you are clear of the area, call for help and keep others away. **DO NOT** approach your vehicle again until utility crews and emergency responders tell you it is safe.

the members' concerns about the increasing height of equipment and the safety dangers associated with that additional height," said Johnson.

It's the start that the CME board envisioned.

"We hope with this resolution that it brings these safety concerns with the size of equipment to the manufacturers so they keep it in the forefront of their minds when designing this large equipment," Gall said.

May Board Meeting Minutes

The regular meeting of the board of directors was held May 16th, 2017. 630602703

Also present were General Manager Derek Sorley, Operations Manager Mike Pisha, Finance & Administration Manager Anna Haynes and Staff Assistant Sherry Bakley.

Routine monthly business consisted of approving the minutes of the previous board meeting and approving new members. Anna presented the financial reports for May.

Anna reported that the office has been doing file clean up; that a member said that it is helpful to use the online services to check his well usage; the Wakpamni Community would like Lacreek to do an informative meeting about budget billing and billing and they have requested us to attend their financial class at the cap office May 30th; asked the board to consider having financial reported a month later, which they concurred and on collections.

Mike reported on 11 new services; replacement of primary URD; on work in progress with the Merriman Tie, Kramer Irrigation, Allen road move, Schwarting to Martin Sub-Transmission progress and Turner Buffalo Ranch retirement; S&L Pole Testing will be doing system maintenance; that Warne Chemical will be spraying all substations and that Alex Christensen and Adam Hahn have been hired for summer help.

Derek gave Josh's report because he was unable to attend the meeting. Discussed the Annual Meeting; the new Facebook page and on the new stock numbers and inventory.

The safety report was presented by Mike and Anna.

Tom reported on the Rushmore Electric board meeting he attended.

Derek reported that he had an employee meeting on April 28th; that the employees have started the 9 hour summer days; that Glen Smith is out for up to 4-weeks due to medical issues; there was a drawing for the West River Golf Tourney with Dane, Aaron, Terri and Stacey being the winners to represent Lacreek; that he met with Federated Rural Electric Insurance Exchange; had meetings with the Policy & By-Law and Salary & Wage Committees; attended a Chamber of Commerce regular meeting and a banquet planning committee meeting and will be attending the SDREA Managers Association meeting June 7-9th in Rapid City.

Discussion was held on the NRECA Regional Meeting Sept. 19th-21st in Minneapolis, MN with no one planning to attend at this time.

Discussion was held on policy updates to #58, #67 #19, #19A, #19B, #44, the General Manager/Selection/Absence and new policy #70 and #71. A motion was made, seconded and carried to approve the changes along with adding new policies #70 and #71.

Discussion was held on Basin Electric updates.

Discussion was held on the Construction Work plan in progress.

Next Board Meeting – June 20th, 2017 at 4:00 P.M. 2402504811

Wanblee Tap Substation Moving Forward

After many years of planning, Lacreek has secured the construction of the Wanblee Tap. This has been a joint effort between Lacreek and Western Area Power. The construction is set to begin early this fall with dirt work and erection of the sub itself. This sub will eventually come on line around early 2018. When finished the substation will provide efficient reliable power to the North and Eastern side of Lacreek's service territory

Transmission Tie Line Work completed

Bolts Construction Company completed a crucial tie line replacement from the Martin Rural Substation to the Schwarting Substation to increase the reliability of service to our members across our service territory. A tie line gives Lacreek the ability to link two of our major substations together.

Plant the Right Tree in the Right Place

For more tips on smart tree planting in your community, contact your local electric cooperative or visit www.ArborDay.org.

Trees beautify our neighborhoods, and when planted in the right spot, can even help lower energy bills. But the wrong tree in the wrong place can be a hazard... especially to power lines.

LARGE TREES

Height/spread of more than 40 feet, such as:

- Maple
- Birch
- Oak
- Sweetgum
- Spruce
- Linden
- Pine

MEDIUM TREES

Height/spread of 25 to 40 feet, such as:

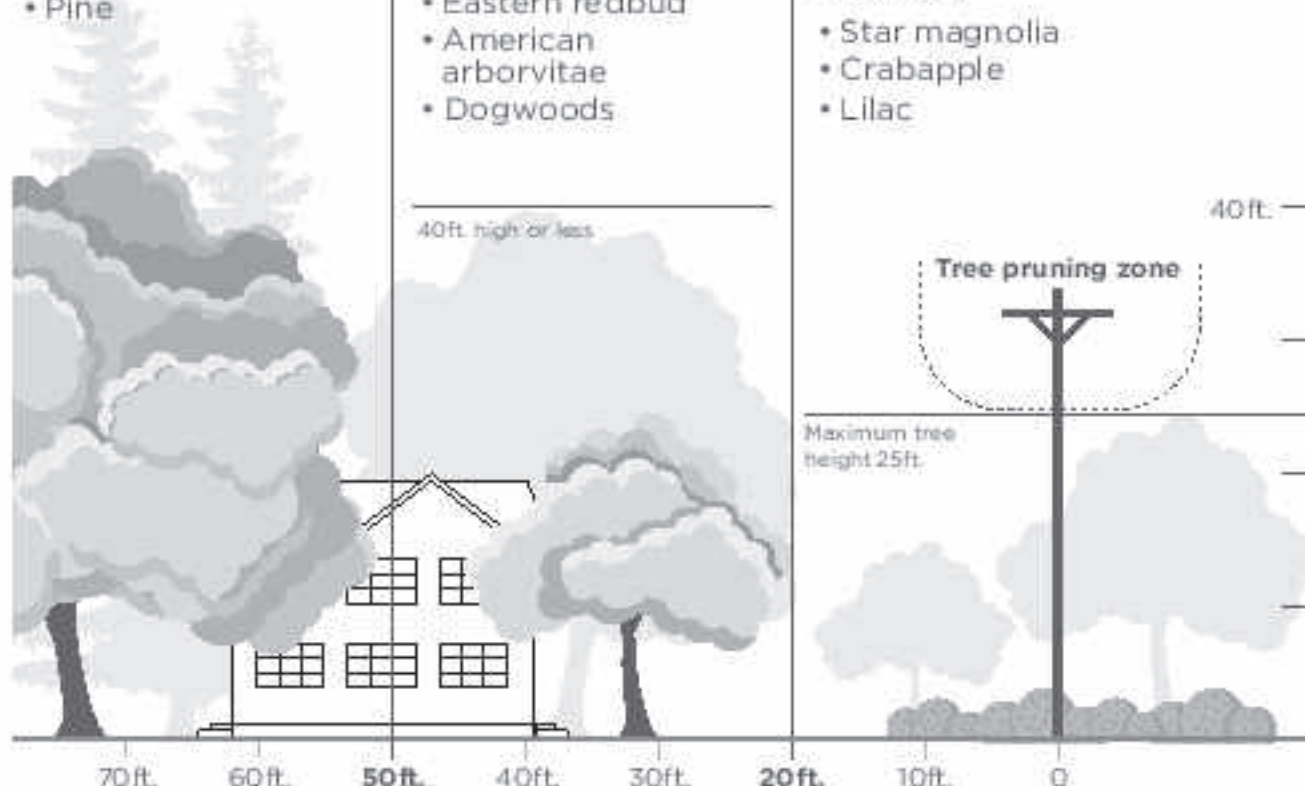

- Washington hawthorn
- Goldenraintree
- Eastern redbud
- American arborvitae
- Dogwoods

SMALL TREES

Avoid planting within 20 feet of power lines. When planting within 20 feet is unavoidable, use only shrubs and small trees.

Height/spread of no more than 25 feet such as:

- Star magnolia
- Crabapple
- Lilac

Be safe! Always call 811 before you dig to locate any buried utility lines.

Right On Target

4-H Youth Excel at Shooting, Archery Sports

STEADY CLICKS, SNAPS, THUMPS AND BANGS WERE heard as 4-H kids lined up, aimed and fired. They traveled from across the nation to compete in the National 4-H Shooting Sports Championships in Grand Island, Neb., and the Daisy BB Gun National Championships in Rogers, Ark. Hundreds of kids competed for their team and for their state. It was stiff competition, yet South Dakota has a winning reputation.

Jocelyn Romey

"The toughest competition we find in the nation is right here in South Dakota," said Sean Kruger, one of Pierre Junior Shooters' coaches.

Kruger, along with Jonathan Hays, coach a 4-H-based youth shooting club in Pierre, S.D., known as the Pierre Junior Shooters. Organized in the mid-1970s, this club is one of many across the nation and state that attracts shooting competitors ages 8 to 18 who are involved in 4-H. It also draws more than 50

kids each year to the Isaak Walton Youth Conservation Center in Pierre to practice shooting and receive safety instruction.

"Our first and No. 1 focus is firearm safety," Kruger said. "Before they ever handle a gun, they go through safety training and have to pass a safety test each year."

The club combines 4-H principles and education with a competitive structure, allowing the kids to compete in multiple area competitions along with the 4-H state and national events and the Daisy BB Gun National Championships.

On July 3, the Pierre Junior Shooters won the championship title and trophy during the 2017 Daisy BB Gun National Championships. Nine kids from the Pierre/Ft. Pierre area competed in this event – Jayce Beastrom, Jasmine Hays, Jessica Hays, Jenna Kruger, Austin Lesmann, Justin Merriman, Natalie Mohr, Alea

Pictured are Natalie Mohr, Austin Lesmann, Jayce Beastro, Rylie Stoesser, Justin Merriman, Jasmine Hays, Jessica Hays, Alea Smith and Jenna Kruger. **Bottom:** The Walton County, Georgia, team sent a congratulations note. Sportsmanship is one of the skills learned. **Below:** The Pierre Junior Shooters will be adding "2017" to their listing of National Champions.

Smith and Rylie Stoesser. Seven kids competed in the team that brought home the trophy and two competed in Daisy's Match of Champions. These two were Jessica Hays and Alea Smith who competed in last year's Daisy national tournament. The kids chosen to represent the club in this competition must earn it by scoring the highest in BB gun shooting during the competitive season – March and April. Other club members are eligible to compete at the national 4-H shooting competition if they score high enough at the state level in air rifle, air pistol, .22 rifle, .22 pistol, archery, shotgun and muzzleloading.

Since 2004, the Pierre Junior Shooters club has won eight Daisy championships. This year, they competed against 70 teams nationwide, including three other South Dakota teams – Humboldt Sharpshooters from Hartford, Lake County 4-H Aces Gun Club from Madison and Marshall County 4-H Sharpshooters from Britton. According to Hays, this year's Daisy competition was the largest, with more teams participating than ever before.

Hays said the purpose behind the Pierre Junior Shooters club is to provide safe and correct shooting instruction to the kids. It's a controlled and safe environment to learn how to shoot as well as compete in local events and national competitions.

"They learn how to compete and be good sportsmen," Hays said. "It teaches them to be committed...and to have integrity."

After stating the benefits a club participant can receive, Hays said, "I want to make it understood that kids and guns do go together if they are taught properly. One hundred seventy-five competitors come into a school gym with guns and no one gets hurt. We are teaching them how to shoot and be safe. It has nothing to do with what is going on in the rest of the country right now."

Coach Rose Kraft of the Marshall County 4-H Sharpshooters which won the Daisy national competition in 2009, emphasized the importance of safety while teaching kids how to shoot. Then, she pointed out values that the kids gain by staying active in a shooting club.

"They learn how to self-advocate, talk to other groups, prepare themselves and focus," Kraft said. "We've had many people go through the program and they come back with top-notch communication and leadership skills. Overall, this prepares the kids for community leadership positions as adults."

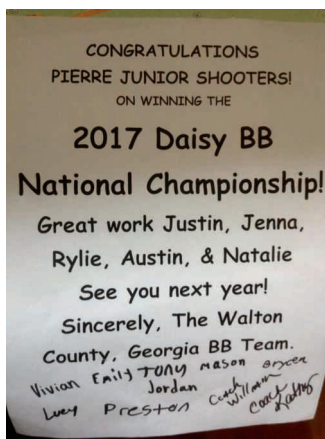

Darby Knoll is one young leader who competed in the 2017 National 4-H Shooting Sports Championships event held June 25-30, a few days before the Daisy national competition. Knoll represented Charles Mix Electric in Lake Andes, S.D., on the 2016 Youth Tour to Washington, D.C.

Knoll said, "I was honored to represent South Dakota this past week at the national shooting sports competition in Grand Island, Neb., in .22 pistol! It was an amazing trip with amazing people creating great memories!"

About 30 kids represented South Dakota during the national 4-H shooting competition. They competed in compound archery, recurve archery, air rifle, air pistol, .22 rifle, .22 pistol and shotgun.

Memories were made and good shots were taken at both competitions this year. After getting home from the 2017 Daisy competition, Kruger said, "We had a great group of kids. They considered each other teammates and family...they really supported each other."

Kruger also said that the competitions throughout the year taught the kids valuable lessons. He said they learn "important concepts that carry over into life...being able to recover from adverse situations and a bad shot."

**They learn how to compete
and be good sportsmen.
It teaches them to be committed
and to have integrity.**

Taking Aim

National Pistol Award Bears South Dakotan's Name

WHEN THE U.S. NATIONAL GUARD HOSTED ITS international marksmanship championships this spring at the Robinson Maneuver Training Center in Arkansas, one of the trophies awarded recognized the contributions of a retired South Dakota public servant.

By Brenda Kleinjan

Today, one is more likely to find John Berheim, a member of Oahe Electric Cooperative in Blunt, S.D., in the cab of a combine assisting with the harvest in central South Dakota than you are to find him on the shooting range.

But for 64 soldiers and airmen from across the U.S. and allied nations who took aim at being the top shot at the 26th Annual Armed Forces Skill at Arms Meeting (AFSAM) this past April at the Robinson Maneuver Training Center in North Little Rock, Ark., Berheim's name is attached to some

serious hardware.

Top marksmen from the United States, Canada, Italy, and the United Kingdom competed shoulder-to-shoulder on four-man teams testing their skills with multiple matches and different firearms systems including pistols, rifles and shotguns.

The top shooter in the pistol competition is awarded the Lt. Col. John A. Berheim Pistol Trophy, named for the retired South Dakota Air National Guardman.

Berheim spent a career as a trooper with the South Dakota Highway Patrol as well as rising through the ranks of the Air National Guard. Much of his time with the patrol was spent in the Plankinton area in southern South Dakota.

While with the highway patrol, he shot with the patrol's competitive pistol team. After retiring in

199, he shifted his competitive focus to shooting with the National Guard teams.

"To get on the Guard team, you had to shoot rifle pretty well, but I was always on the team for the pistol," Berheim said.

He was the only South Dakota Guardsman on the team that would travel internationally, taking Berheim to competitions in Denmark, Belgium, Germany and other allied countries.

To be successful as a pistol marksman takes two key traits, he said.

"You have to have good eyesight and you can't be shaky," Berheim, who holds a U.S. Air Force Pistol Distinguished Badge, explained. "I was lucky enough to have both those traits."

While on the team, Berheim was leading the South Dakota Division of Emergency Management, helping coordinate the state's response to various natural disasters and other emergencies.

While he hung up his competitive holster when he retired after 35 years with the Guards in 2002, his public service wasn't finished. He became the state's Director of Homeland Security, a position he held until retiring for a final time in 2008.

A press release explaining the competition held in Arkansas, noted the annual training competition has an emphasis on marksmanship at all levels of the armed forces. The AFSAM also helps build working relationships with our allied nations by encouraging international camaraderie with U.S. allies.

"It's not every day that we get to train with internationals at an actual International competition," said Lt. Matthew Clancey, a marksman from the Canadian Armed Forces shooting team. "It's a great opportunity for us to come to a different environment, see different match conditions, and the way that you handle and use the firearms." Clancey added, "It's a privilege – to train at this level with such great people."

The range of useful marksmanship knowledge found at this international competition is vast, and the sharing of it is a key aspect.

"It's here at the marksmanship training center where top-notch shooters from all 50 states, multiple military branches and other countries get a great chance to compete together," said Col. Dennis Humphrey, director of the National Guard Marksmanship Training Center. "We operate in a joint environment when we are down range. It's important that these branches and partner nations get together to build relationships, so you can trust the soldier or airmen to the left and right of you."

This competition provides the opportunity to train marksmen in stressful conditions as well as encourage international camaraderie amongst American forces and its allies. This opportunity builds confidence, weapons familiarization and skill for increased battlefield survivability and combat readiness, which is the ultimate goal.

The AFSAM matches included service members from the U.S. Army, U.S. Army Reserves, U.S. National Guard, and three foreign allies: Canada, Italy and the United Kingdom. The competitors engage targets with various military weapon systems and each four-person team is evaluated on field firing, advanced marksmanship and target engagement.

"Returning competitors can attest, all who attend are sure to come away with new contacts, new skills, and the pride of having represented their unit and nation," said Col. Dennis J. Humphrey, NGMTC Commander.

"As competitive as they are, the matches aren't solely about defining who is the best," said Lt. Col. Todd C. Stuff, NGMTC Administrative Officer. "Ultimately, the focus is on training."

The training received during this competition is valuable.

"When the best marksmen from around the globe come together," Stuff continued, "they bring with them valuable experience and insight which they enthusiastically share with their fellow warriors. The shooters then take what they learn back to their units and pass along their new skills."
