Lacreek Electric Holds 69th Annual Meeting

Lacreek Electric held its 69th Annual Meeting in Martin, SD at the Old American Legion Auditorium on April 27, 2017 at 7PM. Lacreek served 588 member for a sit down meal. The kids at the meeting were treated to a movie "The Smurfs" at the local theater. There were 270 registered members at the meeting. There were 4 zones up for election, which ran unopposed. Zone 1 Clarence Allen incumbent, Zone 5 Jackson County Jerry Sharp incumbent, Zone 6 Todd and Mellette County Dean O'Neill incumbent and Zone 9 West Oglala Lakota County Melvin Cummings incumbent. General Manager Derek Sorley recognized all employees and President Tom Schlack recognized the Board of Directors. Vic Simmons General Manager of Rushmore Electric Power Cooperative was the guest speaker. At the conclusion of the meeting there were several prizes handed out and the \$300 grand prize winner was Steven Little Thunder.

President Tom Schlack presenting Steven Little Thunder with the grand prize \$300.00. Congratulations Steven!

Journeyman Lineman Jesse Byerly giving some future members a bucket truck ride. Looks like they are having a good time!

Billing Clerk Terri Gregg giving Janice Red Willow an 18 Volt Cordless Drill Set donated by Border States. Congratulations Janice!

Apprentice Lineman Lonny Lesmeister giving Duane Reddest a crisp \$50.00 bill. Congratulations Duane!

devote 50 cents from their monthly electric payments for
a subscription. Nonmember subscriptions are available for
\$12 annually. Periodicals Postage Paid at Martin, SD and at

\$1000 Scholarship Winners

Samantha Loomis is the winner of the scholarship
sponsored jointly by Lacreek Electric and Basin
Electric. Samantha is the daughter of Tom &
Sharon Loomis.

Paige Slovek is the winner of the scholarship
sponsored by Lacreek Electric. Paige is the
daughter of Mark & Lavonne Slovek.

Justin Morrison is the winner of the
scholarship sponsored by Lacreek Electric.
Justin is the son of Leroy & Bertha
Morrison.

On behalf of the Lacreek Electric
Board of Directors, Staff and
Employees we would like to
congratulate each graduate and
wish them the best of luck in all
their future endeavors.

Know How You Can Stay Safe and Get Through Until Power Gets Restored to You

Severe storms are devastating to homes, properties and lives. These storms can also take down power lines – creating a dangerous situation for all of us, including the linemen and linewomen working hard to get your power turned back on.

How long it takes to get your power restored depends on the extent of the storm's destruction, the number of outages and when it becomes safe for utility personnel to get to the damaged areas. There are many steps in the assessment and restoration process – clearing downed power lines; ensuring public health and safety facilities are operational; checking power stations and transformers; repairing transmission lines, substations, and distribution lines; and getting power restored to customers within the various damaged areas.

Be sure to contact your electric utility immediately to report the outage.

Safe Electricity recommends taking the following safety precautions:

- Just because power lines are damaged does not mean they are dead. Every downed power line is potentially energized and dangerous until utility crews arrive on the scene to ensure

power has been cut off. Downed power lines, stray wires and debris in contact with them all have the potential to deliver a fatal shock. Stay far away and keep others away from downed power lines.

- Never enter a flooded basement if electrical outlets are submerged. The water could be energized.
- Do not turn power off if you must stand in water to do so. Call your electric utility and have them turn off power at the meter.
- Before entering storm-damaged buildings, make sure electricity and gas are turned off.
- Do not use water-damaged electronics before properly restoring them. Electric motors in appliances should be cleaned and reconditioned before use. It may be necessary to replace some of your appliances and electronics. Have your water-damaged items inspected and approved by a professional before using them.
- If you clean-up outdoors after a storm, do not use electronic equipment in wet conditions.
- If you are driving and come along a downed power line, stay away and keep others away. Contact emergency personnel or your utility company to address the downed power line.
- If you do come in contact with a downed power line, do not leave the car. Wait for utility and emergency professionals to make sure the power line is de-energized before exiting the car.

During an outage, Safe Electricity recommends turning off electrical appliances and unplugging major electronics, including computers and televisions. Power sometimes comes back in surges, which can damage electronics. Your circuits could overload when power returns if all your electronics are still plugged in and on. Leave one light on to indicate that power has been restored. Wait a few minutes and then turn on other appliances and equipment – one at a time.

If you use a standby generator, it is critical that proper safety precautions be taken. Always read and follow all manufacturer operating instructions. There should be nothing plugged into the generator when you turn it on. This prevents a surge from damaging your generator and appliances. Operate generators in well-ventilated, outdoor, dry areas. Never attach a temporary generator to a circuit breaker, fuse or outlet. Permanent generators should be wired into a house by a qualified electrician using a transfer switch in order to prevent feeding electricity back into overhead lines, which can be deadly for linemen.

To help you get through, have a storm kit prepared. Keep the kit in a cool, dry place, and make sure all members of the family know where it is.

For information on when to save and when to throw out refrigerated food after a power outage, go to FoodSafety.gov.

Kids' Corner Safety Poster

"Call first or you might hit underground cable."

Seth Lippert, 9 years old

Seth is the son of Dean Lippert, Blomkest, Minn. He is a member of Renville-Sibley Co-op Power, Danube, Minn.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

Dairy Delicious

Blues Buster Smoothie

- | | |
|---|-------------------------------------|
| 1 (6-oz.) container low-fat blueberry-flavored yogurt | 2/3 cup fresh or frozen blueberries |
| 1/2 cup apple juice | 3 to 4 ice cubes |

Combine all ingredients in a blender; blend until smooth and creamy.

Cortney Reedy, Tea

Easy Creamy Chicken Enchiladas

- | | |
|--|--|
| 3 small chicken breasts or 2 large chicken breasts | 1 (7 oz.) can chopped green chilies |
| 2 (10.5 oz.) cans cream of chicken soup | 1 small can sliced olives |
| 3/4 cup sour cream | 2 cups shredded or grated Cheddar cheese |
| 1/3 cup milk | 1 pkg. flour tortillas |

Cook chicken breasts in crockpot until tender. Shred. Mix together cream of chicken soup, sour cream and milk; set aside. Prepare 9x13-inch pan. To the chicken, add chopped green chilies, olives and half of the soup mixture. Roll up chicken mixture in tortillas; 8 to 10 usually fit in a 9x13-inch pan. Spread remainder of soup mixture over all and top with Cheddar cheese. Bake at 350°F. for 35 to 40 minutes. If prepared in advance and refrigerated, bake for 50 to 55 minutes. Serve with sour cream and salsa, if desired.

Jane Ham, Rapid City

Coconut Cream Cheesecake Bars

- | | |
|--|---|
| 84 Nilla wafers, divided | 2 T. sugar |
| 6 T. butter, melted | 2 (3.4 oz) pkg. vanilla instant pudding |
| 1 (8 oz.) pkg. cream cheese, softened | 2-1/2 cups cold milk |
| 1 (8 oz.) container Cool Whip, thawed, divided | 1-1/2 cups coconut, toasted, divided |

Reserve 24 wafers. Crush remaining wafers and then mix with butter. Press onto bottom of 9x13-inch pan. Refrigerate while preparing filling. Beat cream cheese and sugar with mixer until well blended. Whisk in 1 cup Cool Whip. Carefully spread over crust. Stand reserved wafers around edges. Beat pudding mix and milk with whisk in medium bowl for 2 minutes. Stir in 1 cup Cool Whip and 3/4 cup coconut; spread over cream cheese layer. Top with remaining Cool Whip and coconut. Refrigerate 5 hours.

Gail Lee, Brookings

No Bake Cookie Dough Ice Cream Sandwich

- | | |
|--|---|
| 1/2 cup creamy peanut butter | 1-1/4 cups vanilla wafer crumbs (about 35 vanilla wafers) |
| 1/3 cup butter, softened | 1 cup miniature chocolate chips |
| 2/3 cup confectioners' sugar | 4 cups vanilla ice cream, softened |
| 1/3 cup firmly packed brown sugar | |
| 2 tsp. McCormick® Pure Vanilla Extract | |

Mix peanut butter and butter in large bowl until well blended. Add sugars and vanilla; stir until blended and smooth. Stir in vanilla wafer crumbs and chocolate chips. Line a 8-inch square pan with foil, with ends of foil extending over sides of pan. Press 1/2 of the dough into an even layer. Pat remaining dough on parchment or wax paper into 8-inch square. Gently spread ice cream over layer in pan. Flip 8-inch square layer onto top of ice cream. Peel back parchment paper. Cover with foil. Freeze 3 hours or until firm. Let stand at room temperature 2 to 3 minutes to allow ice cream to soften slightly. Cut into 16 bars. Wrap each in plastic wrap. Store in freezer.

Pictured, Cooperative Connections

Spam Hotdish

- | | |
|-------------------------|------------------------------|
| 2 cups macaroni, cooked | 1 can cream of mushroom soup |
| 2-1/2 cups milk | 1/2 green pepper, diced |
| 1/4 cup butter, melted | 1 medium onion, diced |
| 1/2 cup bread crumbs | 1/4 lb. Velveeta, cubed |
| 4 eggs, well beaten | 1 can Spam, cubed |

Combine macaroni, milk, butter, bread crumbs, eggs and cream of mushroom soup. Add green pepper, onion, cheese and Spam. Pour into casserole dish. Bake at 350°F. for about 1 hour or until bubbly. If time is of the essence, casserole can be heated thoroughly in microwave before putting in the oven and then cut baking time in half.

Leann Fredrickson, Aberdeen

Crab Dip

- | | |
|---------------------------------------|--------------------------------|
| 1 (16 oz.) container sour cream | 1 bunch green onions, chopped |
| 1 (8 oz.) pkg. cream cheese, softened | 1 pkg. slivered almonds |
| 1 pkg. ranch dressing mix | 1 pkg. imitation crab, chopped |
| | 2 cups shredded cheese |

Mix together sour cream, cream cheese and ranch dressing mix. Add remaining ingredients. Chill. Serve with assorted chips or crackers.

Pam Hofer, Carpenter

Please send your favorite dessert, salad or garden produce recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2017. All entries must include your name, mailing address, telephone number and cooperative name.

Energy Efficiency Considerations for Homebuyers

Patrick Keegan
Collaborative Efficiency

Dear Pat: I recently became a real estate agent and several of my clients have been asking about the energy efficiency of the homes I show them. Do you have any suggestions about energy-related questions I should help my clients consider before they purchase a home? – Sharon

Dear Sharon: It's great to hear that you want to help

inform your clients. Many homebuyers do not consider energy costs (such as electricity, gas and propane), which are significant, ongoing expenses for any home. The average home costs approximately \$2,500 in energy expenses per year. Think about how much money that is over the life of the home!

Your clients' preferences for the kind of new home they want to buy can have a strong influence on energy performance. For example, the size of a home is one of the most important factors that will determine energy costs. As square footage increases, lighting requirements increase and more importantly, the burden on heating and cooling equipment increases.

In general, newer homes have better energy performance due to advancements in building codes, but buying a new home does not guarantee efficiency. Building codes are not always enforced and a minimum-code home is not nearly efficient as homes built to a higher standard. For example, if energy efficiency or green features are a high priority for your clients, look for homes that have ENERGY STAR®, Built Green or Leadership in Energy and Environmental Design (LEED) certifications.

Newer manufactured homes are typically much more efficient than older manufactured homes but do not have to meet the same energy code requirements of site-built homes. Residents of manufactured homes spend about 70 percent more on energy per square foot of living space as residents of site-built homes. If your clients are considering a manufactured home, those built after 1994 or that have an ENERGY STAR label have superior energy performance.

Once your clients are interested in a specific home, one of

the first factors they should consider is how the energy performance of that home compares to similar homes. Although you may request electricity, natural gas or propane bills from the sellers so that your clients can estimate how much it will cost to heat and cool the home annually, this is not a precise measure of home energy performance. The Home Energy Rating System (HERS) Index is like a "miles per gallon" rating for a home that allows consumers to comparison-shop based on energy performance, similar to the way they can comparison-shop for cars. A certified Residential Energy Services Network (RESNET) Home Energy Rater will need to inspect the home and develop a HERS rating. This rating can be done during the inspection process or you may request a HERS rating from the seller.

Although many homebuyers focus on energy features that have the strongest impact on the aesthetics of the home, such as windows and lighting fixtures, it's the hidden systems like appliances that have the most impact on energy performance. Heating and cooling systems consume about half of a home's energy use and are costly to replace. Here are a couple questions homebuyers should consider about heating and cooling:

- How old is the heating system? If the home's heating system is more than 10 years old, it may be necessary to replace it in the near-term.
- What is the seasonal energy efficiency rating (SEER)? Find out the SEER for the home's air conditioning system. If the air conditioner has a SEER of less than 8, you will likely want to replace it.

A home's building envelope insulates the home's interior from the outdoor environment and includes features like doors, walls and the roof. If the quality of the building envelope is compromised, it can contribute to higher heating and cooling costs. R-Value is the thermal resistance measurement used for insulation, indicating its resistance to heat flow. You may want to learn about the recommended R-value for homes in your region so you will have a general sense about the quality of a home's building envelope.

If your clients determine energy investments are necessary in a home they are considering, it can be helpful to call your local electric cooperative. Many electric co-ops can assist with energy audits and offer incentives for energy efficient heating and cooling equipment.

This column was co-written by Pat Keegan of Collaborative Efficiency. For more information on how to consider energy efficiency when purchasing a home, please visit: www.collaborativeefficiency.com/energytips.

Speech Contest Winners Named

The 56th Annual State Finals of the Resource Conservation Speech Contest were held at the Capitol Lake Visitor Center in Pierre on Saturday, April 22, 2017. The theme of this year's contest was "Soil Health: What Will You Leave?"

Grace Brose was the event's top finisher in a field of seven contestants and received a \$1,100 scholarship from South Dakota's Touchstone Energy® Cooperatives. Contestants in 2017 included Shelby Belmore, Brose, Danika Gordon, Raina Grimsley, Madison Hetland, Kadon Leddy and Lauren Wilkinson.

To compete at the state event, the students had to first win at one of seven local contests.

Grimsley earned a \$750 scholarship for her second-place finish while Gordon won a \$450 scholarship for finishing third.

Ken Gillaspie of Pierre, representing South Dakota's Touchstone Energy® Cooperatives, presents Grace Brose a plaque.

Touchstone Energy® Scholars of the Week Recognized

Touchstone Energy® Cooperatives in eastern South Dakota and western Minnesota honored some of the area's most impressive high school seniors Saturday, April 29, during the 15th Annual Touchstone Energy Scholar of the Year banquet and recognition on the campus of Dakota State University in Madison, S.D.

The event honored the 34 high school students who were chosen each week throughout the school year as the Touchstone Energy Scholar of the Week. It's a program which recognizes students for academic achievement, co-curricular involvement and community service. The students are featured in weekly segments which air on KSFY Television and each student receives a \$100 scholarship for being chosen as the Scholar of the Week.

Ben Pond, a senior at Ipswich High School within FEM Electric Association's service territory, was selected during the banquet as the Touchstone Energy Scholar of the Year. Pond, who plans to attend South Dakota State University in Brookings, S.D., in the fall, received a \$1,000 scholarship. Trevor Sik, a senior at Elkton High School within Tyler, Minn.-based Lyon-Lincoln Electric's service territory, and Tory Arbach, a senior at Marion High School within Marion, S.D.-based Southeastern Electric's service territory, were both chosen to receive \$500 scholarships. The names were drawn from among the attendees.

Dakota State University's President Dr. José-Marie Griffiths was the keynote speaker for the Scholar of the Year banquet. KSFY News anchor Brian Allen served as the master of ceremonies.

Touchstone Energy Cooperatives in eastern South Dakota and western Minnesota provide safe and reliable electricity to more than 113,000 homes and businesses. The cooperatives have sponsored the Scholar of the Week program since 2002. In that time, Touchstone Energy Cooperatives have awarded more than \$75,000 in scholarships as part of the Scholar of the Week program.

Future Lineworkers Win Scholarships

Future line workers enrolled at Mitchell (S.D.) Technical Institute, were awarded scholarships by the South Dakota Rural Electric Line Superintendents Association. Students Nick Jackson, Milbank; Carter Jondahl, Groton; Michael Plaggemeyer, Sturgis; Gage Neuschwander, Rapid City; and Alex Caba, Tabor, were awarded scholarships totaling \$2,500 from the group. Additionally, Sean Kafka of Gregory was awarded the Mark and Kathy Hofer Scholarship and Plaggemeyer also received the Larry Brink Memorial Scholarship.

Line superintendents and the scholarship recipients are, from left, Dakota Energy Operations Manager Lynn Kruse, Cherry-Todd Electric Operations Manager Randy Borer, Nick Jackson, Whetstone Valley Electric Operations Manager Jon Christensen, Carter Jondahl, Codington-Clark Distribution System Manager Jared Terhark, Michael Plaggemeyer, Northern Electric Operations Manager Mike Kelly, Gage Neuschwander and Black Hills Electric Operations Manager Bill Brisk. Not pictured are Alex Caba and Sean Kafka.

Valley Side Farm Makes Cheese an Artform

Jocelyn Romey

FRESH, NATURAL, ARTISAN CHEESE – IT CAN ONLY get better by being locally made. And, it is. Kris Swanson and her husband, Scott, own and operate Valley Side Farm Cheese, LLC in Crooks, S.D., a rural town north of Sioux Falls. The business began in 2012 on the Swanson's eighth-generation family farm, where an old barn built in 1899 serves as the identifying logo for the cheese.

Kris Swanson studied how to make artisan cheese in Vermont at the Vermont Institute for Artisan Cheese (VIAC). From there, she took her knowledge and experience to start her own business. She notes she is the only artisan cheese maker in South Dakota. However, making this cheese by hand can be hard work and a time-consuming endeavor.

"It's more labor intensive than I bargained for," Swanson said. "I give a lot of credit to people who

make artisan cheese."

She carefully described the lengthy process of pasteurizing, culturing, cooking, cutting, weighing and pressing the cheese that was displayed in a refrigerated storage room. In all, the process of preparing the cheese took two to three days before it could be placed on the shelf.

Swanson said, "My favorite part in this process is seeing the finished product – the smell, the taste. When you cut into a wheel of cheese, it's so pretty. The satisfaction you get from making a product like that is so cool."

Swanson provides her local customers with a variety of Cheddar cheeses, mozzarella and even string cheese. Some of her current flavors include garlic, bacon, dill, red wine and beer.

Unlike other store-bought cheeses, Swanson's

University in Brookings where they conduct antibiotic testing on the milk before delivering it. While explaining this process, Swanson smiled and said, “Did you know, it takes 10 pounds of milk to make one pound of cheese.”

Inspired by her love of cheese, Swanson said, “I like trying new things.”

She wanted to try something new and something she loved doing. Now, she has steady business and returning customers who are mostly local. Swanson has also been providing tours of her shop

cheese is made with natural and fresh ingredients. Swanson does not use additives such as color or preservatives like many other providers.

“Most cheese is yellow because dye is put into it,” Swanson said. “People always say my cheese tastes so clean. That’s because no preservatives are in it.”

Swanson buys ingredients locally, including the milk, which she buys from South Dakota State

to interested groups such as the Red Hat Society, homeschoolers, FFA chapters, culinary classes and more.

Even though it’s a new business, maybe Swanson always had it in her to make cheese. While talking about her business, she smirked and said, “I was a dairy princess in high school.”

So, the former dairy princess from Cottonwood County in Minnesota is now South Dakota’s artisan cheese maker.

For more information on Valley Side Farm Cheese, visit their Facebook page @ValleySideFarm-Cheese. Swanson’s cheese can be found in select stores and restaurants in the Sioux Falls area.

Left: Rows of cheese wheels with varying flavors sit on shelves at the Valley Side Farm Cheese Shop, ready for customers.

Above: The iconic 1899 barn serves as the identifying logo for the Valley Side Farm Cheese brand of Crooks, S.D.

Top: Valley Side Farm Cheese owner Kris Swanson stands with her 300-gallon cheese vat that she ordered from the Netherlands.

Cover: Multiple cheese samples are produced and displayed at Valley Side Farm Cheese.

February Board Meeting Minutes

The regular meeting of the board of directors was held February 21st, 2017.

Also present were General Manager Derek Sorley, Line Superintendent Mike Pisha, Office Manager Anna Haynes, Staff Assistant Sherry Bakley and Member Services Director Josh Fanning.

Routine monthly business consisted of approving the minutes of the previous board meeting and approving new members.

General Manager Sorley discussed: "letter of concern" from Butte Electric Cooperative, Inc., which was discussed and a motion was made, seconded and approved to sign the letter along with Butte Electric; The board also watched a Urea Project Video which explained the project cost overrun of approximately \$220 million dollars and the board approved the General Manager to attend a new CEO/General Manager Orientation in April in Arlington, VA.

Anna reported on the write offs. A motion was made, seconded and carried to write off the past due balances totaling \$19,893.70.

Anna reported that Fuchs Locker donated the buns for Ron-da and Wayne's retirement party; about write off history; on fees to be reviewed next month; that the audit went well and we passed our credit card security scan.

Mike gave an update on the Martin to Schwarting Sub-Transmission; about the Batesland Outage; on OCR maintenance; about line patrol in Hisle and Tuthill; on the substation snow removal; gave an update on the new digger truck, trencher and cable locator quotes.

The safety report was presented by Mike and Anna.

Josh reported on the annual meeting; about irrigation load control; on high bill complaints; about the NREA meter school he attended; that we received several scholarship applications; on Nebraska Net Metering; that he attended the Stock Show in Rapid City; about an energy audit on Lacreek's headquarters and on discontinued pendants for main street messenger.

Discussion was held on the Bylaw Amendment, which will be taken to a vote by the membership at the 2017 Annual Meeting. A motion was made, seconded and carried to bring the Bylaw Amendment change to a vote at the 2017 Annual Meeting.

Discussion was held on the Rushmore Annual Meeting April 7th at The Lodge in Deadwood with Clarence being the delegate and Marion being the alternate. Donovan also plans to attend.

Discussion was held on the NRECA CCD Director Courses in Pierre April 5th-7th with no one planning to attend at this time.

Discussion was held on the NRECA Legislative Conference in Washington, D.C. April 24th-26th with no one planning to attend at this time.

A motion was made, seconded and carried to change the annual billing on Irrigations from 6 months to 12 months.

Derek reported on the Martin Sub NERC Compliance; on the SDREA Mac Meeting he attended in Pierre; about a list of inventory items that was discussed with RUS and Auditors; on a letter received seeking a large donation; about the NRECA Annual Meeting he will be attending in San Diego and on the NRECA CEO/General Manager Orientation he would like to attend.

A motion was made, seconded and carried to purchase the 2015 Ditch Witch Trencher. 2803007108

General Manager Derek Sorley presented a resolution to retire capital credits for the years 1991 and 1998. A motion was made, seconded and carried to retire 100% of Lacreek's 1991 capital credits in the amount of \$135,268, 100% of 1998 G&T capital credits in the amount of \$77,385 and estates of \$100,000.00 in the total amount of \$312,653.

Next Board Meeting – March 21st, 2017 at 1:30 P.M.

Lacreek Sending Student to D.C.

Rachel Ireland is the winner of the 2017 Washington D.C. trip. Rachel is the daughter of Brent and Tauna Ireland. Rachel along with other participants from South Dakota will meet for an orientation meeting in Sioux Falls, S.D. The group will then fly to Washington, D.C. Rachel will learn about government, the cooperative philosophy and rural electrification. She will also participate in touring several historical places in the area. Rachel qualified for this trip by simply filling out a "Data Sheet" and taking an "Open Book" test on the history and organization of rural electrification. Lacreek would like to congratulate Rachel and hope that she not only has a great learning experience, but a wonderful time as well.

March Board Meeting Minutes

The regular meeting of the board of directors was held March 21st, 2017.

Also present were General Manager Derek Sorley, Line Superintendent Mike Pisha, Office Manager Anna Haynes, Staff Assistant Sherry Bakley and Member Services Director Josh Fanning.

Routine monthly business consisted of approving the minutes of the previous board meeting and approving new members.

Anna reported that there were a couple of billing issues dealing with the bill print and some accounts billing incorrectly; that we implemented a 30 second answering message due to the overwhelming call volume; we passed our credit card security scan last week and Billing Clerk Jessica Cook will be out of the office in July on Maternity leave.

Mike reported on work in progress; on OCR (Oil Circuit Recloser) maintenance; about patrolling the service areas; that a trencher has been ordered and the new digger truck is ready to ship; that a few line crew attended a Safety Leadership Conference and that he attended the NRECA Supervisory Workshop.

Josh reported on the Annual Meeting; that Rachel Ireland was the Youth Tour Winner; about the Lacreek energy audit; on Main Street Messenger and on the Leadership Work Shop he attended.

The board drew for the Lacreek Scholarship with Paige

Slovak and Justin Morrison being the winners. The Basin/Lacreek winner is Samantha Loomis.

The safety report was presented by Mike and Anna.

Tom reported on the Rushmore Electric Meeting he attended.

Derek reported on the Martin Sub/NERC Compliance; that Basin executed the documents for the termination of the Shannon Substation lease and the Asset Purchase Agreement; on RUS; about the NRECA Annual Meeting; on Board Policies; about setting up the Work Order System in iVUE; on the negotiations with Board States Supply Chain on the AutoCrib Tool Vending Machine; that we hosted the Martin Chamber of Commerce meeting on March 16th; on the Employee Meeting February 22nd; about the Annual Meeting preparations and about the summer help.

Discussion was held on the revision of Policy #61 with a motion being made, seconded and carried to add an additional \$1000.00 scholarship to incoming college sophomores with the selection coming from prior applicants that did not win the first year.

Sherry gave an updated on changes to Policies that were discussed during a Policy meeting held February 9th, 2017. The following policies are being updated: 33, 33A, 36, 40, 42, 51, 57, 59, 63, 64, 66, 69, and the Fee Schedule A. A motion was made, seconded and carried to approve the requested changes attached here to.

Discussion was held on a Resolution for approval to allocate Capital Credits. A motion was made, seconded and carried to approve the resolution attached hereto.

Next Board Meeting – April 18th, 2017 at 1:30PM

Basin Youth Trip Winners

Lacreek Electric sponsors two area students for the South Dakota Rural Electric Youth Excursion. The excursion will be July 25th through July 28th 2017. Erica Bakley and Josie May were selected for this trip. Congratulations Erica and Josie, on behalf of the Lacreek Board of Directors, Staff and Employees we hope you girls have a great time.

Erica Bakley

Josie May

Find Your Account Number and Receive A Bill Credit

Find your Lacreek account number in the magazine and you will get a \$10.00 credit on your next months bill. Please call our office when you see your account number in the magazine to receive your \$10.00 credit.

Who Will Answer The Call?

Approximately 1 percent of all South Dakotans volunteer on their local fire departments.

Brenda Kleinjan

WHEN THE SIRENS BLARE IN SMALL TOWNS AND rural areas across South Dakota and western Minnesota, those responding to the emergencies are often volunteers.

“Volunteer fire departments serve a vital role to us here in South Dakota. Often times they are the only ones available to meet public safety needs in rural areas of the state,” said South Dakota Fire Marshal Paul Merriman.

In South Dakota, a majority of the state’s 8,500 firefighters are volunteers. According to statistics avail-

able from Merriman’s office, only five of the state’s 337 fire departments are career paid departments, employing 443 firefighters. The remaining 332 departments are staffed by volunteers (seven departments have a combination of paid and volunteer firefighters).

But, when an emergency arises, it doesn’t distinguish whether the people responding are volunteers or paid professionals.

“To become a certified volunteer firefighter in the state, a recruit has to undergo approximately 150 hours of instruction and hands-on training. Training

requirements have greatly increased over time out of necessity. Volunteer fire departments serve the community by responding to a wide variety of situations, from emergencies that immediately threaten life or property, to routine citizen requests for information and assistance,” Merriman said.

“Fire department staffing and firefighter recruitment and retention issues continue to present big challenges to volunteer fire departments. Time demands, increasing call volume, changes in the ‘nature of the business’ of firefighting, aging communities and other factors have contributed to reductions in the number of men and women joining and remaining in the volunteer fire service. The demand or need for volunteers continues to increase as the list of their duties continues to grow,” Merriman said.

In early June, firefighters from across the state will gather at Mitchell Technical Institute in Mitchell, S.D., for the State Fire School. While there, they will train in nearly 30 different areas.

There will be courses one expects: live fire training, firefighter survival, structure live burn and structural firefighting essentials. And there will be courses related to department operations such as junior firefighter programs, honor guards, grant writing, small engine maintenance and fire investigation.

And then there are the courses that cover the gamut of emergencies a fire department might encounter: mass triage, responding to an active shooter event, auto extrication, bus extrication, trench rescue, water rescue, grain bin rescue, hazardous materials awareness and the list goes on.

But, a firefighter’s training doesn’t stop at the conclusion of the State Fire School.

“Training requirements over and above the certified firefighter endorsement are established locally and vary from department to department, depending upon the type of incidents they typically respond to,” Merriman said.

In addition to training, fire department funding and fire department staffing (recruitment and retention) are some of the biggest challenges faced by volunteer fire departments across the state and the U.S., Merriman said.

“Becoming a volunteer firefighter takes a tremendous amount of time, and is a very demanding and sometimes dangerous job. The personal satisfaction that comes from helping others is the No. 1 reason people give why they choose to serve in the fire service. Being a volunteer is a rewarding experience and one of the best ways you can make a difference in your community. The skills and experience gained as a volunteer firefighter are invaluable and can have a positive and lasting effect on your life and the lives of those around you,” Merriman said.

“We take firefighters and local fire departments for granted. Until we need them, we don’t realize how important they are. No matter how big your community department is, support them. Show them that they matter.”

For information on becoming a volunteer firefighter, contact your local fire department.

Grand Electric Cooperative in Bison, S.D., assisted the Lemmon, S.D., Volunteer Fire Department with a training scenario involving a car and a power pole. Throughout South Dakota, more than 8,000 people serve on one of the state’s 332 volunteer fire departments.

DID YOU KNOW?

- As of July 1, 2016, there were 8,560 firefighters at South Dakota’s 337 fire departments.
 - When compared to the state’s size of 77,121 square miles, this equates to one firefighter per nine square miles. (On average, each fire department covers 228 square miles.)
 - Of South Dakota’s state population* of 865,454, less than 1 percent of all South Dakotans are a firefighter.
 - Minnesota has 20,921 firefighters at 757 active fire departments, the majority of which are volunteer or paid on-call departments.
 - When compared to the state’s size of 86,943 square miles, this equates to about one firefighter per four square miles. (On average, each department covers 115 square miles.)
 - Of Minnesota’s state population* of 5,519,952 people, less than 0.3 percent of all Minnesotans are a firefighter.
- (*Based on the U.S. Census Estimate for July 1, 2016)

Co-ops Energize Safety Message

THE HUM OF ELECTRICITY SURGING THROUGH THE high voltage demonstration trailer used by South Dakota's electric cooperatives to teach about electrical safety is often the only sound one hears when the demonstration is being conducted.

The crowd is usually silent as the person narrating the presentation pauses, allowing the audience to focus on what is before them.

They watch as a grapefruit glows, burning from the inside out and giving off a strong burnt citrus odor that lingers in the demonstration area. When cut in half, those watching the demonstration are able to view the damage done as electricity coursed through the fruit.

Whether used to inform producers attending the Sioux Empire Fair's Ag Appreciation Day in August or local fire departments in their training for scenarios that may involve power lines or to give

future line workers a compelling look at the need for keeping safety in mind when working around electricity, the high voltage demonstration trailer leaves an impression.

For the hundreds of children who watch the presentation each year, it's hard to compete with their wide-eyed reactions as they see the fruit sizzle or a brat wurst fry. The demonstrations help reinforce the importance of staying away from downed power lines, avoiding climbing trees near power lines and, in general, being safe around electricity.

During the demonstration, the equipment used by line workers – from insulated gloves that are tested every 30 days to hot sticks of insulated fiberglass – is explained and demonstrated. Also explained are the other items of personal protective equipment used by linemen – from hard hats to safety glasses and fire resistant clothing.

line worker Bob Johnson uses a branch to show the hazards of climbing a tree near a power line. **Opposite Page:** A mainstay of the Black Hills Stock Show for more than a decade, the high voltage demonstration trailer has been used to deliver electrical safety messages to those attending the show. This year, the trailer was used before the Sheep Dog Trials. File Photo

The demonstration also covers the importance keeping antennas, farm equipment and other tall items out of power lines. The need for proper installation of back up generators is also discussed as is avoiding flying kites or fishing near power lines.

The high voltage demonstration trailer will be making appearances across the state this summer. It is scheduled to be in the Armour area in late May, Ipswich area on June 1 and then to Fort Pierre June 3 for an appearance in conjunction with the Casey Tibbs Match of Champions Rodeo.

In July it is scheduled for the Aberdeen area and then the Sioux Empire Fair's Ag Appreciation Day in early August followed by a visit to the Timber Lake area.

Contact your local electric cooperative for more information about when electrical safety demonstrations are being conducted in your area.

A review of some ways to play it safe with overhead electric lines:

- Fly kites away from overhead power lines. Wet string is a conductor of electricity.
- Do not try to remove a kite, fishing line or any other lost object from an overhead power line.
- Do not use electric insulators on overhead lines for target practice. A broken insulator is a serious hazard.
- Do not climb in trees that are in contact with overhead power lines. A green branch is a good conductor of electricity.
- Stay away from fallen power lines and warn others of the danger. Call your local utility company and report the location.
- If a power line falls on your car, stay inside the car. The rubber tires will act as an insulator.
- When handling a long metal pole or antenna, moving grain augers or elevators, look up to avoid accidental contact with an overhead electric wire.
- Treat all electric power lines and electric wires as serious potential hazards.

Regional Dateline

May 19

Tesla Car Rally, Custer, SD
